Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of the claims in this application.

Listing of claims:

- 1. (Currently amended) A method for separation of α -penta-O-galloyl-D-glucose (PGG) from a mixture of α -PGG and β -PGG comprising the steps of:
- a) adding water to a PGG mixture containing 50% or more $\alpha\text{-PGG}$ and 50% or less $\beta\text{-PGG}$;
 - b) mixing the PGG and water to dissolve the PGG; and
 - c) filtering out any undissolved particles; and
 - d) allowing the filtered solution to stand undisturbed until crystals form

wherein the crystals comprise the α-PGG.

- 2. (Original) The method of claim 1 wherein double distilled water is used in step (a).
- 3. (Original) The method of claim 1 wherein the water to PGG ratio is about 20 mL of water for about 1 g of PGG.
- 4. (Original) The method of claim 1 wherein the mixing step is done for about 5 minutes.
- 5. (Currently amended) The method of claim 1 wherein the mixing step is done at a temperature greater than 30 20°C.
- 6. (Original) The method of claim 5 wherein the mixing step is done at 80°C.
- 7. (Currently amended) The method of claim $\underline{30}$ [[1]] wherein the filtering step is done using a 45 μ m filter.

Application No. 10/597,395 Attorney Docket No. 27211/04220 Response to Office Action

- 8. (Currently amended) The method of claim 1 wherein the filtered solution of step (c) (d) is allowed to stand at a temperature lower than 30 20°C.
- 9-11. (Canceled)
- 12. (Previously presented) The method of claim 1 wherein the purity of the α -PGG is 95% or greater.
- 13. (Currently amended) A method for separation of β -PGG from a mixture of α -PGG and β -PGG comprising the steps of
- a) adding acetone to a mixture of PGG containing 50% or more $\beta\text{-PGG}$ and 50% or less $\alpha\text{-PGG}$:
 - b) mixing the PGG and acetone to dissolve the PGG; and
 - c) filtering out any undissolved particles; and
 - d) allowing the filtered solution to stand undisturbed until crystals form

wherein the crystals comprise the β-PGG.

- 14. (Original) The method of claim 13 wherein the acetone is added to the PGG at a ratio of about 5 mL acetone for about 1 g PGG.
- 15. (Original) The method of claim 13 wherein the mixing in mixing in step (b) is done for about 5 minutes.
- 16. (Currently amended) The method of claim 13 wherein the mixing step (b) may be done at a temperature greater than 30 20°C.
- 17. (Original) The method of claim 16 wherein the mixing step (b) is carried out at 80°C.
- 18. (Currently amended) The method of claim <u>31 +3</u> wherein the filtering step (e) is done through filter paper.

Application No. 10/597,395 Attorney Docket No. 27211/04220 Response to Office Action

- 19. (Currently amended) The method of claim 13 wherein step (c) (d) is done at a temperature lower than 30 20°C.
- 20-22. (Canceled)
- 23. (Previously presented) The method of claim 13 wherein the purity of the α -PGG is 95% or greater.
- 24. (Previously presented) A method for preparing single crystal α-PGG comprising the steps of:
 - a) adding water to a sample of α-PGG having a purity of 95% or greater;
 - b) mixing the α-PGG and water to dissolve the α-PGG;
- c) filtering out any undissolved particles and placing the filtered solution in a clean vessel; and
 - d) maintaining the filtered solution undisturbed until α-PGG crystals appear.
- 25. (Original) The method of claim 24 wherein the water is added to the α -PGG at a ratio of about 100 mL of water for about 1.0 g α -PGG.
- 26. (Original) The method of claim 24 wherein step (d) is carried out for about 15 days.
- 27. (Previously presented) A method for preparing single crystal β -PGG comprising the steps of
 - a) adding acetone to a sample of β-PGG having a purity of 95% or greater;
 - b) mixing the β -PGG and acetone to dissolve the β -PGG;
- c) filtering out any undissolved particles, placing the filtered solution in a clean vessel;
 and
 - d) maintaining the filtered solution undisturbed until crystals appear.

Application No. 10/597,395 Attorney Docket No. 27211/04220 Response to Office Action

- 28. (Original) The method of claim 27 wherein ratio of acetone to PGG is about 50 mL of acetone per about 1.0 g β -PGG.
- 29. (Original) The method of claim 27 wherein step (d) is carried out for about 20 days.
- 30. (New) The method of claim 1 further comprising a step of filtering out any undissolved particles.
- 31. (New) The method of claim 13 further comprising a step of filtering out any undissolved particles.
